**Subject:** Microsoft = bad for the world

To put it simply, this trial and "settlement" is a farce. Microsoft is trying to do to the federal government what it's done to countless competitors over the years. This company is ruthless, powerful, wealthy and without conscience. You cannot let this continue, period. A world with a tame Microsoft would be the only way to ensure the growth, stability and security of the Internet, commerce, the economy, and the country. My terms are strong and true.

Do not let them get away with corporate rape and murder any longer. Do not let them run roughshod over hapless consumers. DO NOT LET THEM WIN.
